I am currently taking Dr. Eaton's "Environmental Issues and Ethics" and "Communication and Intelligence in Animals and Humans" classes this Fall 1984 term, Old College, Reno, Nevada. I consider myself extremely fortunate in this because it has opened up a whole new world for me.

Not only is he knowledgeable as regards animal behavior and environmental issues, but demonstrates a deep love, concern and dedication in these areas as well.

Dr. Eaton has a rare gift. He can communicate knowledge and ideas in a way that is understood not only by one's mental self, but by one's spiritual self as well.

When a teacher has the ability to strike that chord of understanding deep within, one begins to see with new eyes. This has been my experience.

He teaches not only with words- sometimes with a smile, sometimes with a tear or silence, but always with understanding.

To experience not only with the mind, but with the heart as well-this is learning, a precious gift not often enjoyed these days.

The impact cannot be totally expressed in words.....

Thank God for Randy Eaton.
